Your Keyboard and mouse are now ready for use. Install the Logitech® SetPoint™ Software to do the following:

• Enable some of the F-keys and customize up to 14 keys on the keyboard

• Enable the Mute icon on the LCD

• Enable the tilt wheel and customize up to 6 buttons on the mouse

Español

Ya puedes usar el teclado y mouse. Instala el software Logitech® SetPoint™ para:

• Activar algunas de las teclas F y personalizar hasta 14 botones en el teclado

• Activar el icono de silencio en la pantalla LCD

• Activar el botón rueda y personalizar hasta 6 botones en el mouse

Français

Votre ensemble clavier et souris est maintenant prêt à l'emploi. Installez le logiciel Logitech® SetPoint™ pour effectuer les actions suivantes:

• activer les touches F et personnaliser jusqu'à 14 touches du clavier;

• activer l'icône de sourdine sur l'écran LCD;

• activer la roulette multidirectionnelle et personnaliser jusqu'à six boutons de la souris.

Português

O teclado e o mouse estão prontos para ser usados. Instale o Logitech® SetPoint™ Software para fazer o seguinte:

• Ativar algumas teclas F e personalizar até 14 teclas no teclado

• Ativar o ícone de sem som no LCD

• Ativar a roda de inclinação e personalizar até 6 botões no mouse

Keyboard features: F-key usage

User-friendly enhanced F-keys let you launch applications easily. To use the enhanced functions (yellow icons), first press and hold the **FN** key; second, press the F-key you want to use.
Tip In the software settings, you can invert the FN mode if you prefer to access directly the enhanced functions without having to press the FN key.

2nd - Press an F-key

**1st -** Press and hold the FN key

Keyboard features: F-keys and more

1. Internet zone

FN + F1 🏠 Launches Internet browser

FN + F2 ✉ Launches e-mail application

FN + F3 🔍 One Touch Search™*

Mouse features

Zoom
Press scroll wheel to zoom.
MicroGear precision scroll wheel
Tilt wheel for side-to-side (horizontal) scrolling through spreadsheets or wide documents. The scroll wheel doubles as a middle button. Press down to use and press again to release.
Scroll toggle
With the flick of a switch, change between precision (click-to-click) scrolling and hyper-fast scrolling.

Precision scrolling

Use click-to-click mode to navigate lists or slides.

Hyper-fast scrolling

The wheel spins freely, allowing you to fly through long documents and Web pages.

More mouse features

1. **Back and Forward Buttons*** – Press to flip between web pages.

2. **Application Switch*** – Press rubber grip to switch between applications.

3. **Battery Indicator Light** – Turns red when a couple weeks of battery life remain.

4. **On/Off Switch** – Slide to turn mouse on and off.

5. **Battery Door Release** – Press where indicated and slide door off mouse. Reduce weight by installing a single battery.

6. **Receiver Storage Space Inside the Mouse**

* Application Switcher and side-to-side scrolling require Logitech software. Depending on your operating system, the back, forward, and middle buttons may also require Logitech software.

Battery management

Battery icon

Your keyboard and mouse have up to three years of battery life.*

Battery sleep mode

Did you know that your keyboard and mouse go into sleep mode after you stop using them for a few minutes? This feature helps limit battery usage and eliminates the need to keep switching your devices on and off. Both your keyboard and mouse are up and running immediately once you begin using them again.

How to check the battery level for the keyboard

The battery icon on the keyboard LCD shows the current battery level for the keyboard. As the battery level decreases, the battery icon shows how much battery power remains, as shown in the image to the right.

100%   60%   30%   10%
How to check the battery level for the mouse

Mouse bottom

Option 1: Turn the mouse **off** then back **on** using the On/Off switch on the mouse bottom. If the LED on top of the mouse glows green for 10 seconds, the batteries are good. If the LED blinks red, the battery level has dropped to 10% and you have only a few days of battery power left.

On/Off switch

Option 2: Launch the SetPoint Software, and click the Mouse Battery tab to see the current battery level of the mouse.

Mouse top

LED

* Battery life varies with usage and computing conditions. Heavy usage usually results in shorter battery life.
unifying

Plug it. Forget it. Add to it.
You've got a Logitech® Unifying receiver. Now add a compatible wireless keyboard or mouse that uses the same receiver. It's easy. Just start the Logitech® Unifying software* and follow the onscreen instructions. For more information and to download the software, visit **www.logitech.com/unifying**

Troubleshooting

Keyboard and mouse are not working

🗸 **Check the USB connection.** Also, try changing USB ports.

🗸 **Move closer?** Try moving the keyboard and mouse closer to
the Unifying receiver, or plug the Unifying receiver into the receiver
extender cable to bring it closer to the keyboard and mouse.

🗸 **Check battery installation.** Also check the battery power of each device.
(See *Battery management* for more information.)
On the mouse bottom, slide the On/Off switch right to turn on
the mouse. The Battery LED on the mouse top case should light green
for 10 seconds. (See *Battery management* for more information.)

Troubleshooting

✓ **Are you experiencing slow or jerky cursor movement?**
Try the mouse on a different surface (e.g., deep, dark surfaces may affect how the cursor moves on the computer screen).

✓ **Is the keyboard turned on?** Slide the keyboard Off/On switch to the **On** position, as shown in the image below. The keyboard Status icons should light up.

ON

Status icons
✓ **Re-establish the connection.** Use the Unifying software to reset the connection between the keyboard/mouse and Unifying receiver. Refer to the Unifying section in this guide for more information.

✓ **Install Logitech SetPoint Software** to customize your keyboard and mouse in order to fully take advantage of all features. logitech.com/downloads
