### Product Description

The ViewSonic LDE136G-152 is a 136" accessible All-in-One LED display designed to deliver impressive visual clarity and dependable performance for corporate, educational, and public settings. A pre-built control box simplifies installation and helps achieve a lighter, more integrated build. The lighter design and slim 52 mm profile make wall mounting easier, while the 99% screen-to-body ratio creates a sleek, bezel-free look that blends seamlessly into modern interiors. Durable Glue-on-Board (GOB) surface protection resists impact, dust, and moisture, achieving IP54 and IK06 ratings for long-lasting reliability in high-traffic areas. The OS architecture restricts access to apps, network connectivity, and user storage to ensure simplified, secure operation and a reliable plug-and-play experience. Q-SYS-certified compatibility enables seamless integration with control systems for unified AV management and smoother workflows, and HDMI CEC support allows automatic power and device synchronization for simplified operation. With 600 nits of brightness and a 6,500:1 contrast ratio, the LDE series delivers vivid, high-impact visuals for meetings, lectures, and presentations.
